

Abstract of the Disclosure

There are provided an adsorbent which can effectively adsorb and remove endogenous cannabinoid in fluid, and a process for removing endogenous cannabinoid in fluid by means of the adsorbent. The adsorbent of endogenous cannabinoid comprising an adsorbent for endogenous cannabinoid comprising a water-insoluble material containing a substance whose solubility parameter δ is at most 12 ($(\text{cal}/\text{cm}^3)^{1/2}$) is obtained. Endogenous cannabinoid in fluid can be effectively adsorbed and removed by contacting the adsorbent of endogenous cannabinoid with fluid containing endogenous cannabinoid.
